

L0 Business & Solution Design

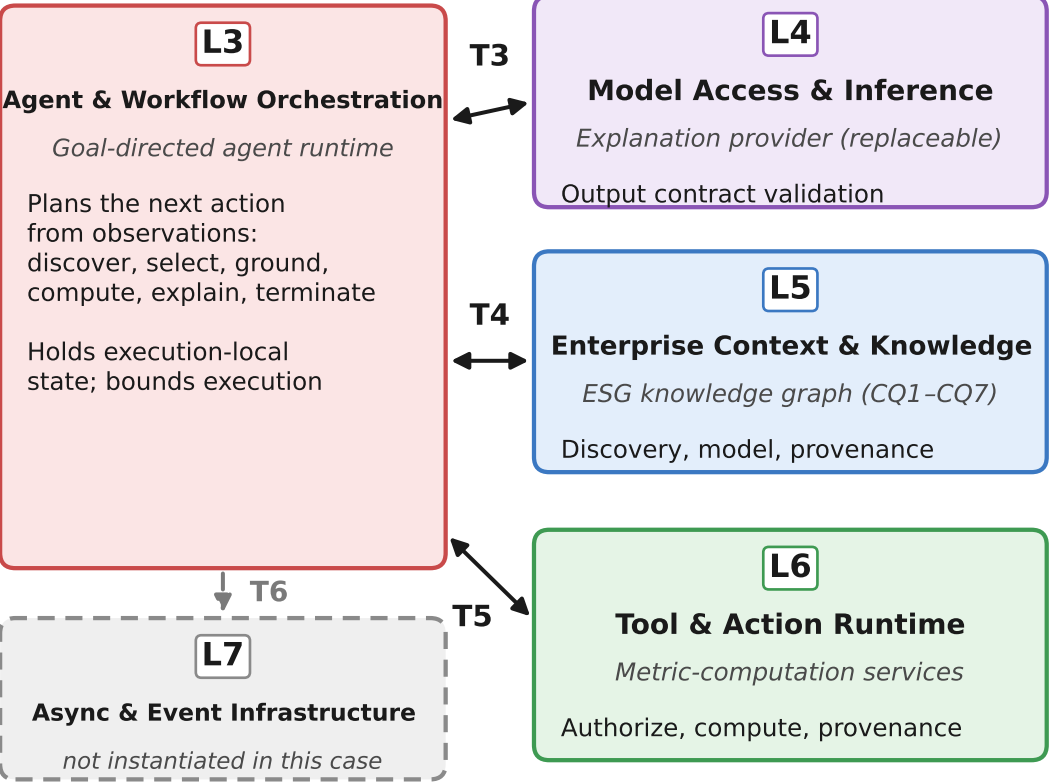

Case requirements and governance: ESG metric definitions, reporting requirements, traceability and control policies (design time, not a runtime path)

↓ requirements and constraints

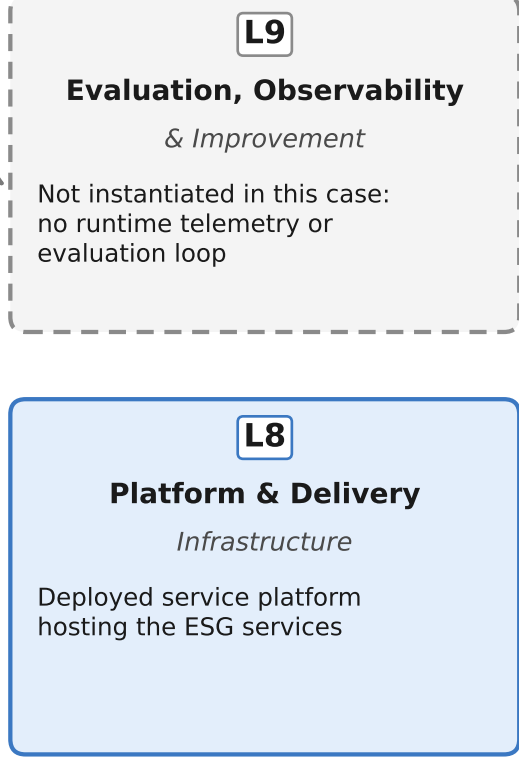

Client and Access

Agentic Coordination and Enterprise Services

Platform and Evaluation

Interaction types

- | | |
|--|---|
| T1 Client Request / Response | T5 Action Intent / Observation |
| T2 Identity & Authority Context | T6 Async Task / Observation Event (not exercised) |
| T3 Inference Request / Result | T7 Operational & Evaluation Evidence (not exercised) |
| T4 Context Query / Grounded Context | T8 Improvement Feedback (not exercised) |

Notation and recorded results

- ↔ realized in the recorded execution
⬅---➡ defined, not exercised; dashed box: not instantiated
- 11 interaction occurrences realizing 5 of 8 types (T1-T5).
5 goals: 3 action sequences, occurrence counts 2, 6, 8.
